

Craig V. Miller

Areas of Expertise

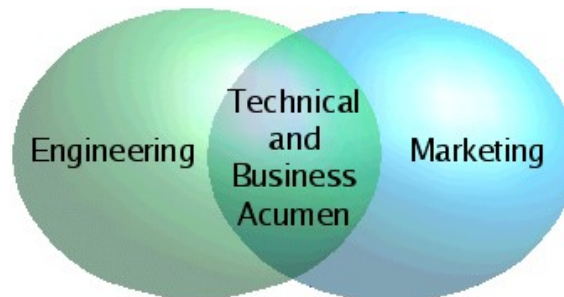

- Network Consulting
- Product Verification
- Product Marketing
- System Engineering
- Product Management
- Broadcast Engineering

With a broad background, Craig Miller recognizes that his value is in knowing how business works, and the importance of maintaining customer commitments.

Craig has an extraordinary blend of technical and business skills, with a proven track record of successfully bridging the gap between Engineering and Marketing. His expertise in Product Development, including Verification, Marketing, and Product Management are enhanced by his very strong customer orientation. Craig is a technically focused professional with a solid understanding of business and product development processes.

He has broad technical experience in the telecom, and broadcast sectors. His proficiency extends to all layers of the OSI model, from Ethernet Switching, and IP Routing while with Bay Networks to Web Switching with Alteon Web Systems (a division of Nortel). Additionally, he has over 15 years experience in management of Linux/Unix systems, Web Services and IPv6 Network Design.

A highly effective communicator, Craig is equally adept at conveying complex technical concepts with diverse groups such as customers, senior executives and engineers. His business experience extends from Product Management at Nortel to owning a successful consulting practice for over ten years.

Craig's solid grasp of all stages of development leads to successful products focused on cost effective and profitable solutions. His solid technical and business acumen makes him a strong and valuable contributor to a Product Development Team.

Craig is a Certified Bay Networks Router Engineer, Certified NEC ATM Switch Engineer, a RedHat Certified Technician (RHCT) Redhat Linux, and a Hurricane Electric Certified IPv6 Professional.

Bridging the Gap ...
